MODULAR SCAN REFERENCE SYSTEM

ACCURATE SCAN SOLUTIONS

- 7 Diameters
- Multiple Connections (\varnothing 3.4-5.4mm)
- Unique Smart Geometry

Designed to improve scan stability, reduce rework and support a cost-efficient digital workflow.

Improved Scan Accuracy

Additional geometric reference points increase scan stability and reduce stitching errors.

Reduced Re-Scanning

More stable scan data reduces errors and repeated scans.

Intelligent Geometry Design

PEEK Material

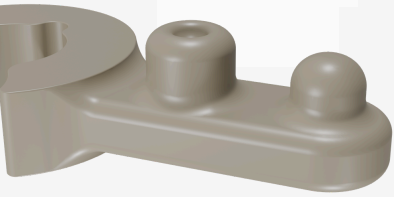

Provides excellent durability and is fully autoclavable for repeated sterilization cycles.

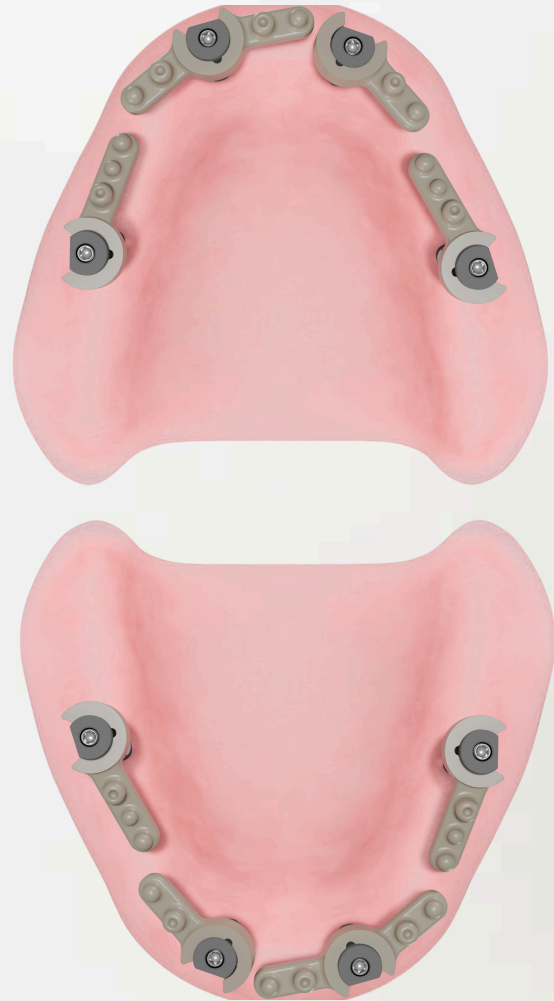

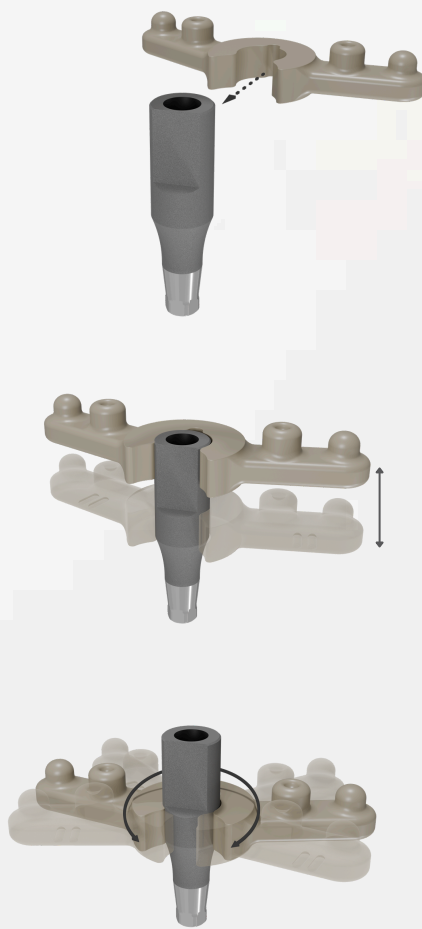

Better Prosthetic Fit

Cost-Efficient Digital Workflow

Rounded wing geometry improves scanner visibility, enabling faster data capture and smoother scanning.

Universal Compatibility

choose
your
type

Type I Ø3.4mm	
Type II Ø3.7mm	
Type III Ø4.0mm	
Type IV Ø4.4mm	
Type V Ø4.7mm	
Type VI Ø5.0mm	
Type VII Ø5.4mm
